Local pastors in turn, Protestant.	

The Commonwealth of Massachusetts.

TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

In accordance with section 2 of chapter 241 of the Acts of 1915, we have the honor to present our thirteenth annual report as trustees of the Gardner State Colony.

During the year Dr. John G. Blake of Boston resigned from our Board after nine years of faithful and conscientious service.

The colony is indebted to him not only for an active interest in its medical problems but for his broad and sympathetic interest in everything which affected the colony.

We have also suffered the loss by death of Mr. Wilbur F. Whitney of South Ashburnham. He brought to the problems of the colony a ripe experience and rare qualities of business judgment. As a near neighbor to the colony, he was frequently called upon for service, and we mourn and regret his loss. The vacancy caused by his death has been filled by the appointment of Mr. Thomas H. Shea of Fitchburg.

The increase in the number of patients at the colony has been halted for some years. Two causes have contributed to that end: relatives object to the removal of patients to so remote a place, and other institutions are finding more opportunities for employment of the class of patients that have been in the past sent to us. Our present problem therefore is to develop the population we have rather than to build for more.

We have several pressing needs. It is good business to keep our employees contented and happy. Frequent changes do not make for efficiency. It also makes for efficient work to give the patients hours of recreation. We have, however, no place large enough to get our people together, either for religious services or for social gatherings. At present such gather-

ings are held in the day room of one of the dormitory buildings. The inevitable obstruction of exits incidental to such uses and the difficulty of fixing seats to the floor make the fire or rather the panic risk a serious one, and we feel that even our present use should be largely curtailed. We should have a building for such purposes if we are to continue this part of our work.

The increasing pressure of the insane population in the State has crowded our main group of buildings and we need relief in two directions. A comparatively small expenditure would put enclosed verandas on both dormitory buildings. This would give better treatment to the sick, especially of the tubercular, and would increase our sleeping accommodations. We are the most crowded in our dining-room facilities, and we need to utilize the wing of the domestic building, now used as a laundry, for more dining space. Our laundry work has also outgrown our facilities, and we should have a new laundry building. This would add materially to the efficiency of our work. While our patients are of the quiet type, occasional disturbed periods in some cases are met with. It is an imposition on the quiet patients to have to live through these noisy outbreaks, and we should have two small brick buildings, one for men and one for women, where such cases can be temporarily treated. All these buildings can be constructed by our own labor, including that of patients, at a cost less than would be had under a contract system.

We also need some enlargement of our water supply — at small expense — to guard against a shortage in dry seasons, and our heating system can be operated more economically if the changes recommended by the engineer of the State Board of Insanity are made.

Some years ago we abandoned the manufacture of our own electricity and purchased a supply through the Gardner Electric Light Company from the Connecticut River Company. As a part of the agreement, the Gardner Company built the connecting transmission line for which the State pays the annual rental of 10 per cent. of the cost. The company, however, stipulated that the trustees should recommend to the Legislature to purchase the line at cost. This rental should be terminated as soon as possible.

We have to report a successful year of patients' labor. Satisfactory crops have been raised and much work has been done by our patients that would otherwise have been paid for. This shows in our per capita cost, and if it is rising, it is still kept down by our own self help.

We beg to express our appreciation of the services of the superintendent, Dr. Thompson, his staff and his corps of employees, who have worked harmoniously together for the welfare of the institution and the Commonwealth. The report of the superintendent is submitted herewith.

EDMUND A. WHITMAN.

THOMAS H. SHEA.

SUPERINTENDENT'S REPORT.

To the Trustees of the Gardner State Colony.

I present herewith the thirteenth annual report of the superintendent of the Gardner State Colony.

Owing to a difference in the "financial" and "hospital" year, matters relating to finances are for the year ending November 30, while those relating to hospital matters are for the year ending Sept. 30, 1915.

Matters relating to patients, their mental diseases, the movement of population, etc., will be found in statistical form in the latter part of this report.

During the year just past continued progress has been made. As this colony was conceived as a "rural community" rather than an institution of the usual type, for the purpose of showing what if any real value there might be in industrial treatment as prescribed in individual cases of mental disease (which prior to 1902 was discussed, but little made use of), the real progress made must be studied not for a single year but over a series of years.

It was the purpose of the colony when founded and has been our aim since to have the patients assist as far as possible in their own support. A daily average of upwards of 90 per cent. have been occupied, and have to a greater or lesser degree assisted in such support.

The changing character of patients transferred to us should be noted. During the first years of the colony the patients received were of a much higher mental type than those which have been received the past three years. Those we now receive are largely the deeply demented class requiring greater effort on the part of the instructors, but it is this class, probably more than any other, that is in the greatest need of our assistance. As other institutions have taken up actively the treatment by occupation, we probably will continue to have cases of terminal dementia until such time as the colony may be developed to receive patients of this district direct from their homes.

From the beginning we have endeavored to occupy each and every patient in some occupation which they themselves might choose, or in which improvement might reasonably be expected. In assigning patients to occupations it has constantly been borne in mind that an adult in most states of mind knows when something worth while has been accomplished, and he usually prefers to occupy himself with a normal or worth-while occupation. Our patients are adults, most of whom have been at some time "normal" in mind. While occasionally patients are seen who interest themselves in making a rag doll or a floor-wax flower, this usually is merely an outward expression of a desire to construct. We have endeavored to aid such patients to construct articles which would be of benefit to them or their associates. Child-like evidences of a desire to form have been carefully followed and encouraged, because frequently the child-like expression is due not to the child mind but to a neglect in relatives or caretakers to encourage the diseased adult mind. In encouraging constructive occupation there has gradually been developed an "industrial atmosphere" in which new patients, as a rule, at once take up some occupation; in fact it has been a rule that every patient admitted shall be examined the day of entrance and assigned to some occupation for the following morning. He usually does not continue the occupation first assigned him and is changed from time to time as it is indicated, but always by order of the attending physician. Placing a patient at some interesting, if possible constructive, occupation, immediately he is received, largely prevents him from becoming a ward idler, so many of whom occupied the wards of our institutions in the past.

Although I lay special emphasis upon the value of constructive occupation I do not wish it understood that I believe invalid and simple, amusing occupations have no place in occupational treatment; quite the contrary, I think they do, and we practice them, but with our particular population of adults we have found that they are more interested, and thereby benefited, by adult occupations. We are inclined to treat them, in other words, as normal adults. It is impossible to show in a report the real benefit individuals have received, neither can the accompanying tables of completed work show the steps taken to interest and train patients to obtain these results, but they

do show what can actually be accomplished by them. In referring to these tables especial note should be made that the articles made or produced are principally for the benefit of the patients themselves, — buildings for their use, and furnishings for them; clothing to wear; farm products to be used on the table as food, etc. The accompanying tables summarized show that all construction and repair work is done by the colony and not by outside labor; all furniture has been made and repaired; all clothing, hats, caps, shoes, slippers, stockings, mittens and underclothing worn by the patients have been made by them, likewise all brooms, brushes, mattresses, pillows, mats, rugs and towelings, much fancy work, basketry, leather work, copper, pottery, weaving, etc.; all vegetables, milk, eggs and poultry for our population of 886 have been raised; much fruit and vegetables have been canned and dried.

The following summary shows the extent of the out-door operations: —

Vegetables (acres),	59
Field crops (acres),	58½
Hay (acres),	82
Orchard and small fruits (acres),	15
<hr/>	
Total acreage under cultivation,	214½
<hr/>	
Total value of farm products,	\$42,134.75
Land brought under cultivation (acres),	13
Brush land subdued (acres),	80
Woodland cleared of undergrowth (acres),	45
Pasture land cleared (acres),	5
Land reforested with pine seedlings (acres),	4
Land set to small fruits (acres),	2
Shade trees set out,	6
Shrubs, rose bushes, etc., set out,	240
Lumber cut and sawed (feet),	48,000
Total excavation: —	
Earth (cubic yards),	11,500
Rock (cubic yards),	600
Excavation of earth includes —	
Sewer beds at Gardner cottages, sewer drains (ditches) (lineal feet),	1,200
Drainage (ditches) (lineal feet),	3,000
Grading about buildings (square yards),	850

Stones removed from field (tons),	21,940
Used as follows: —	
Buildings and foundations (tons),	3,700
Roads (tons),	16,000
Fillings (tons),	1,540
Crushed in stone crusher (tons),	700
Permanent road built complete (lineal feet),	6,839
Temporary road built (lineal feet),	3,500
Road work includes —	
Bridges built,	1
Culverts built,	3
General repairs on about 4 miles of road.	
Three miles of sheep and cattle fence built.	
Sheep barn built 60 by 20 feet.	
Sheep shed built 60 by 14 feet.	
Dog-proof yard built 60 by 70 feet.	

DIVERSION AND RECREATION.

The usual diversions such as are practiced in all institutions have been continued. Dancing is probably the most popular. A special effort has been made to provide more out-of-door recreation, especially for the women, consisting of rides, picnics and parties, while many have attended nearby fairs, circuses and the like. On three evenings during the summer outdoor moving pictures were much enjoyed by the patients. Each holiday has been suitably observed, the two most enjoyed being the Fourth of July and Christmas. This year we provided what proved to be a much more interesting day than any, — an annual cattle show and fair day. Fifteen committees, elected by the officers themselves, arranged and carried through the following program, with the aid of patients: —

Morning parade of decorated floats.

Contests between draft horses, oxen, plowing matches, etc.

Athletic events.

Twenty Midway attractions.

Dinner served in large tent on lawn.

Ball game (State Colony *v.* Hubbardston Athletic Association).

Athletic events continued.

Exhibits of industrial work, cooking, preserves, etc., live stock, vegetables, fruit, etc. (prizes awarded in each entry).

Old-fashioned farmer's costume ball in the evening for employees, with an oyster supper.

This year it was not open to the public, but so many have requested that in future it be open, that plans are being made to have a two-day fair next year, one day of which will be open to the public. Perhaps small admission fees, articles for sale, etc., may help financially to provide for more entertainment during the year.

Employees have continued to arrange socials and entertainments through their own committees, which have done much to develop interest and good fellowship among them.

EXHIBITS.

The general public in the past has known but little of the operation of its institutions, but has been influenced too often unduly by criticism of them. We early felt that one of the best methods of enlisting general interest in hospitals for the insane would be to present something to them of a practical nature, something that might serve as a connecting link. In 1908 an exhibit was arranged and sent to two county fairs, after which it was placed permanently in a room at the colony and opened to visitors. Enlarged and varied it has been sent each year since to an increasing number of public meetings. This year it has been exhibited in nine different places, while four other requests have been refused because of conflicting dates. This I believe shows an increasing active interest in our institutions and cannot fail in my opinion to result in a growth of confidence, which is the thing now most needed in our public institutions. We have declined to sell articles at these exhibits, although requests to purchase have been numerous, feeling strongly that so far as possible articles should be made that can be used by this or some other institution, and the exhibit used only for educational purposes.

MEDICAL.

There have been no outbreaks of any contagious diseases. Two of our employees have died during the year. With the growth of the colony there is seen a gradual increase in the amount of medical and surgical work, and the time is approaching when separate hospital buildings will be needed. Sick

patients are not best treated on our closed receiving wards, nor employees in their own rooms.

We have been fortunate in having no changes in our medical staff. Continued, active, loyal service, such as our staff has given, is necessary for the successful carrying on of the work outlined, and should be encouraged by good living accommodations and salaries commensurate with the services required and the interest shown.

The Worcester North Medical Society met with us on July 27, at which papers were presented and cases shown by each member of the staff.

Members of the staff have been called upon to address outside meetings. A clinic has been held monthly in Fitchburg, our nearest city, and once in Winchendon. As we are situated in the center of an essentially rural section of the State and as our own population is not rapidly changing, these clinics have not been as active as in some other institutions. It seems best for us to see individual cases in the homes as called upon by relatives or the attending physician, and this we have done at all times when called upon without expense to the family.

Family care taken up within the year has been gradually extended, and we close the year with 29 patients boarded out. Greater progress could be made if the rate we are permitted by law to pay — \$3.25 per week — could be increased.

Dr. Kenworthy spent six weeks at the psychopathic department of the Boston State Hospital in the study of the practical application of special tests for the determination of mental defect, and has since conducted this part of the work at the colony.

A dietitian was added in March, whose chief duty has been to direct patients in preparing special diets for the sick.

BETTERMENTS.

No new buildings for the accommodation of patients have been opened. The Ray farm and buildings have been purchased and will be soon ready for occupancy. But few changes will be made in the house as purchased. An appropriation for filter beds at the Gardner cottages was made, and we are constructing these with our own labor.

A small store has been erected. Here a male patient carries for sale such supplies as the employees desire to purchase. This store is operated by the patient and has no connection with our institution store. It fills a long-felt want, as the nearest store is 3 miles distant.

A detached locker building and smoke room has been erected at the Belcher cottage. This removes from the cottage two objectionable features,—smoke and clothing worn in farm work.

A two-story sheep house 20 by 60 feet has been erected at the Westminster cottages, where the propagation of sheep is now receiving intelligent and promising attention.

Steam heat has been installed in the Valley house.

Extensive repairs on side track and coal trestle, required by the railroad company, have been made.

A basement room beneath the store has been made in which to keep molasses, oil, etc.

NEEDS.

Two buildings for disturbed patients are badly needed. According to our proposed plans each building will accommodate ten patients and two nurses. It is our desire to make provision for our patients as they become disturbed, and we believe this can best be done here in small units, thus giving greater attention to the individual patient.

Certain changes in our heating plant have been suggested and the Richard D. Kimball Company recently investigated and have made a report and recommendations.

To avoid shortage of water in dry seasons several additional driven wells should be added.

Our laundry equipment is essentially the same as first installed for a much smaller number of patients and employees. It is now necessary to operate the laundry six days per week with some evening work. The equipment first installed is now nearing the end of its usefulness and is inadequate. The removal to a proposed new building would permit the extension of the patients' dining room to the rooms now used as a laundry.

A chapel and assembly hall is much needed. The only room we now have for religious services and entertainments is the

center day room of our women's receiving ward, which is entirely too small to accommodate more than one-third of our people, and with movable seats is dangerous if a confusion should start for any reason when the room is crowded. There is no stage in this room, — it is merely a sitting room. Moving-picture entertainments are not permitted.

In 1912 a contract was entered into with the Gardner Electric Light Company to purchase electricity. The erection of a transmission line was necessary. The State is paying such a high rate of rental that it should be purchased.

To permit better treatment of the sick and for the segregation and treatment of the tubercular, etc., enclosed verandas on the men's and women's wards are greatly needed. All of the work could be done by our own labor.

ACKNOWLEDGMENTS.

I wish to acknowledge with thanks the receipt of numerous magazines, papers, etc., from friends of the institution, especially the following: Mrs. Amie H. Coes, yearly subscriptions to seven monthly magazines, as well as other articles; Mrs. Alice M. Spring, playing cards, magazines, etc.; Massachusetts General Hospital, 158 library books; McLean Hospital, 60 library books; Mrs. Herbert B. Howard, magazines; Mr. G. R. Godfrey, magazines and papers; Mrs. Arnold A. Bent, magazines; Gardner Boat Club, magazines.

I wish to acknowledge with grateful appreciation the continued support you have given me during the past year.

Respectfully submitted,

CHARLES E. THOMPSON,
Superintendent.
